

SmartForceNL

Creating the smartest workforce in Canada - One business at a time.

SmartForceNL is a joint project of the Department of Advanced Education and Skills (AES), the Newfoundland and Labrador Association of Technology Industries (NATI), and Bluedrop Performance Learning, which aims to make Newfoundland and Labrador home to the best trained workforce in Canada. The SmartForceNL initiative provides thousands of online courses FREE, using the power of CoursePark - the world's fastest growing learning network for small businesses - to make it happen.

SmartForceNL has a Learning Network on CoursePark with dozens of critical online courses that can help any small business in the Province complete for employees, keep these employees for longer, and help them become more productive. These courses are offered for free for NL users! The SmartForceNL program covers the cost for companies and workers in Newfoundland and Labrador.

SmartForceNL can transform your organization in 3 ways:

- Employees can build Lifelong Learning Profiles and can quickly complete free courses on everything from WHMIS to Sales Skills to Advanced Leadership
- Small companies can create private and secure Learning Networks to assign, track, and manage training for employees
- Managers can build their own courses in minutes and assign them to individuals to track the results from a simple, easy to use web interface

For more information, visit the [SmartForceNL webpage](#).
