Employment Opportunity

Position Title: Geomatics Technologist or BCLS

Position Status: Contract with potential full time / permanent opportunities

Location: Across Canada and International

Objective:

INITIAL. Exploration Services invites field Geomatics Technologists and BCLS to join our growing resource exploration team. IES specializes in ground geophysics and geomatics surveys nationally and internationally.

Job Description:

- Collecting and processing GPS, conventional and integrated survey data to produce accurate digital elevation and terrain models for reducing ground geophysics data.
- Collecting and processing point cloud data from UAV photogrammetry and LiDAR and terrestrial scanning equipment.
- Working nationally and internationally in remote and often extreme wilderness environments.
**(we currently need a surveyor for back to back contracts in the Canadian arctic, the Yukon and Fiji).*

Job Requirements:

- Physically fit and ready to travel. This is NOT an urban surveying position. We work in the tundra, the taiga, the alpine, the deserts, the jungles, the ice caps and in every type of remote wilderness on the planet.
- Degree or Diploma of Technology in Geomatics with a minimum of 3 years field experience.
- Proficiency with Trimble equipment and software. GIS is a strong asset.
- Experience as a motivated, independent, capable and energetic party chief. A mentor to geophysicists in the process of field surveying.

Employees of INITIAL. Exploration Services are required to have a valid BC driver's license; a driver's abstract and criminal record check will be required for candidates interviewing for this position. We have a ZERO TOLERANCE POLICY for drug and alcohol abuse.
